

UDHAYA KUMAR R

Vellore, Tamil Nadu – 632602 | +91-7810043127 | udhay12405@gmail.com | [LinkedIn](#) | [GitHub](#)

Personal Summary

Information Technology graduate combining hands-on experience across digital marketing, full-stack development (Java, MySQL), and data analysis (Python, machine learning). Delivered social media campaigns, built a team-based CRUD application, and applied ML techniques to real-world datasets. Seeking to bring a versatile technical and analytical skill set to a growth-focused organization.

Skills

Digital Marketing, Social Media Marketing, SEO, Meta Ads, Google Analytics, Content Creation, Canva, Premiere Pro, HTML & CSS, Web Development, Communication, Teamwork

Work Experience

Digital Media Coordinator | Populus Empowerment Network Aug 2025 – May 2026

Managed day-to-day digital media and social media content across multiple platforms, maintaining a consistent publishing schedule. Planned and executed digital marketing campaigns end-to-end, tracking performance via Google Analytics and Meta Ads dashboards to inform content strategy. Collaborated cross-functionally with design and content teams to produce engaging multimedia content using Canva and Premiere Pro.

Java Full Stack Developer Intern | Besant Technologies Apr 2025 – Jul 2025

Developed Java applications with MySQL backends, implementing full CRUD functionality via JDBC to support core data operations. Built a Student Management System as part of a four-member team, contributing to database design and backend logic under an Agile-style workflow. Gained hands-on experience across the full Java development stack, from database design to application logic.

Projects

3D Spectrogram-Based Speech Sentiment and Prosody Detection using Transformer-Driven Deep Learning Architecture

Developed an AI-based speech sentiment and prosody detection system using Transformer models. Integrated Tacotron2 and HiFi-GAN for natural speech synthesis. Tech: Python, PyTorch, TensorFlow-TTS, librosa, NumPy.

Assessment of Marginal Workers in Tamil Nadu – A Socioeconomic Analysis (ADS)

Analyzed Census 2011 data to identify employment trends using machine learning. Performed data preprocessing, K-Means clustering, and exploratory data analysis (EDA). Tech: Python, Pandas, Scikit-learn, Matplotlib, Seaborn.

Education

Bachelor of Technology – Information Technology | May 2025

Sri Balaji Chockalingam Engineering College, Arni, India

Grade: First Class | GPA: 7.9

Diploma in Mechanical Engineering | May 2021

Rajagopal Polytechnic College, Gudiyattam, India

Pass Percentage: 93%
